Own your throne

smart and eco-friendly toilets

We are WASHKing: an award-winning, Ghana-based team on a mission to bridge the gap between safe sanitation and limitless achievement.

We know that economic, social, and environmental well-being should be accessible for all, not just for a few. We know that good hygiene raises status and wealth potential. That moving up in the world starts with knowing how you deserve to feel.

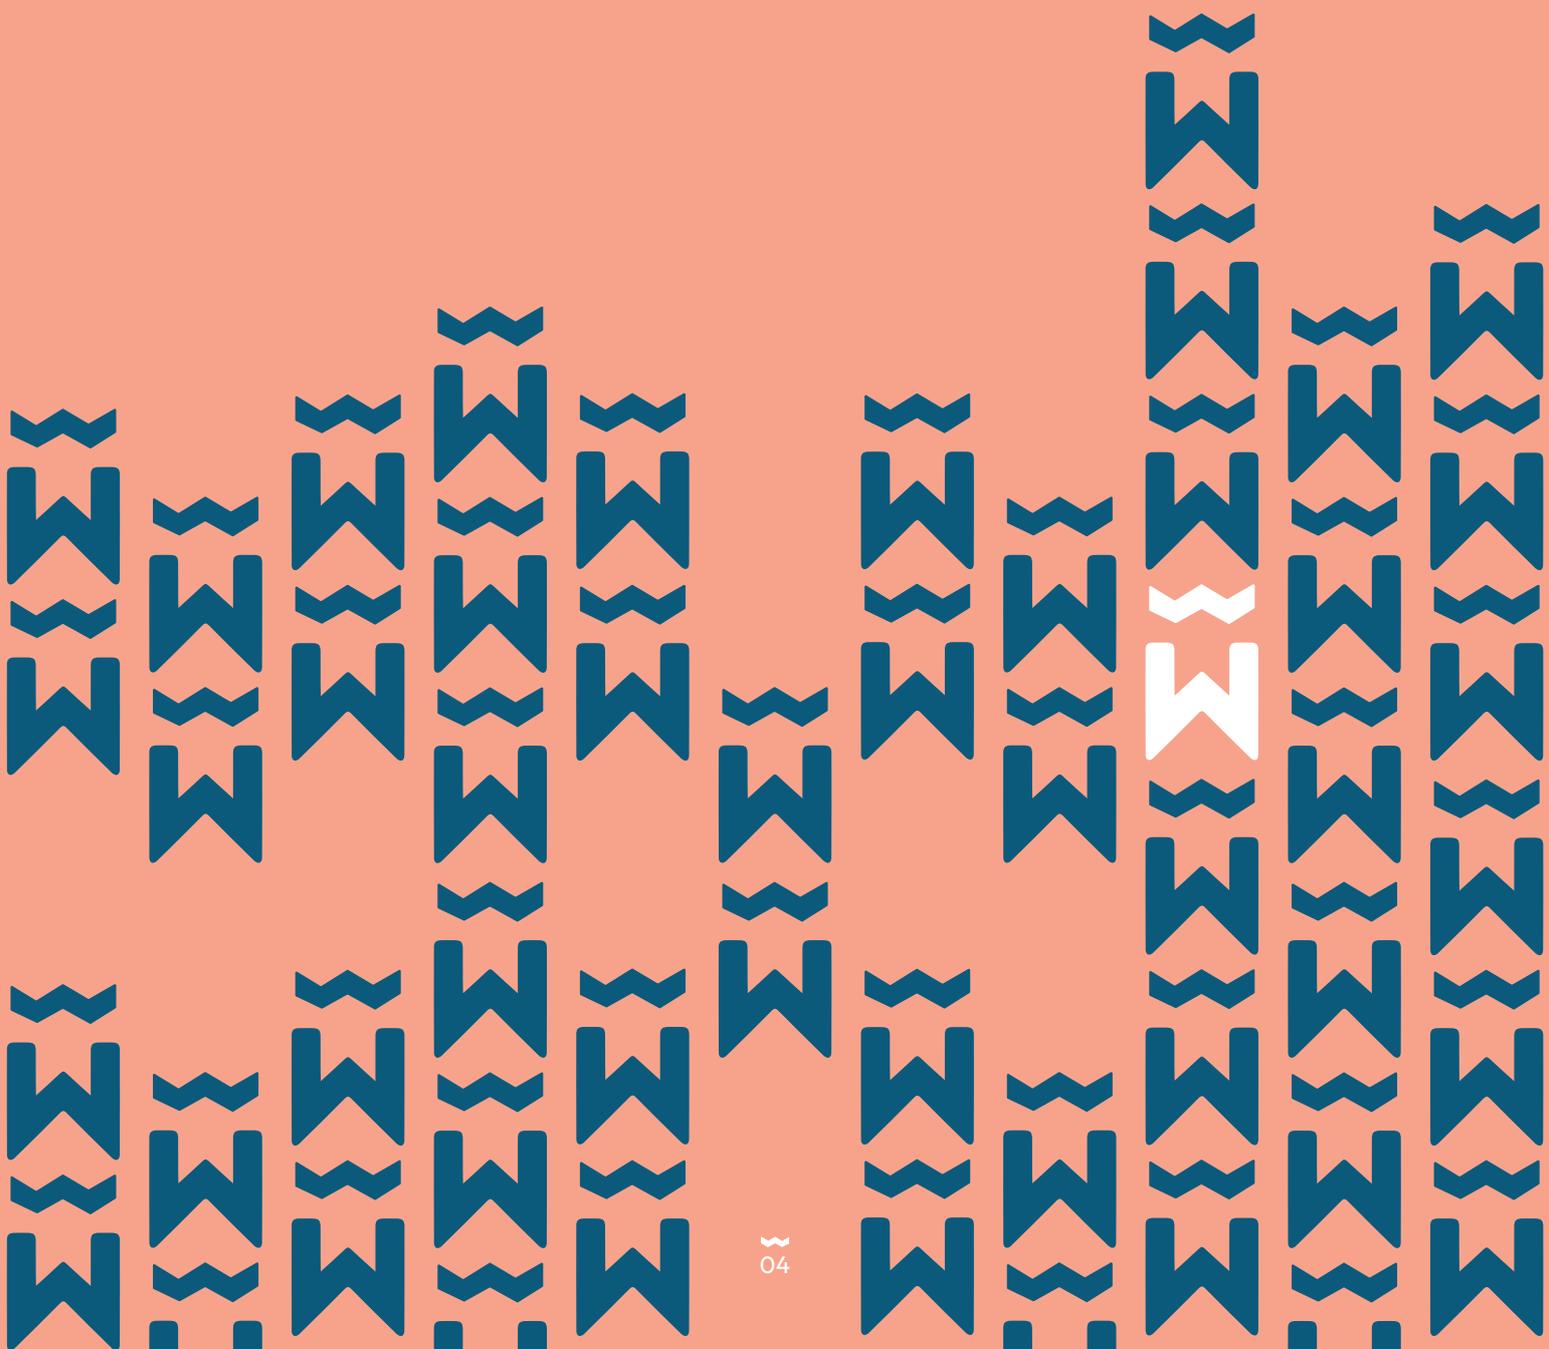

Like royalty.

From smart-locking doors to space-maximizing layouts, our products are designed for the future of private sanitation. By combining local artisan-made materials with compostproducing treatment Farms, our processes contribute towards a more sustainable world. And with flexible payment terms and digital pay-as-you-go technology, we provide uninterrupted access at a price you can afford.

So come, take a seat. Own your space.

Own your throne.

MAMAAKIBAN

MESSAGE FROM THE CEO

Welcome to our product catalogue!

I'm thrilled to share with you our mission to improve the health and well-being of low-income and underserved communities in developing countries such as Ghana. At our company, we believe that everyone deserves access to safe and sustainable sanitation.

Unfortunately, many communities around the world lack access to this basic necessity. This is a problem that cannot be ignored. That's why we've developed a revolutionary smart toilet system that can be installed anywhere, using a biodigester that turns waste into valuable compost. And payment terms that anyone can afford. Our system uses innovative technology to filter out harmful contaminants, ensuring that the solution is safe for both the environment and the people. It's also easy to install and maintain, making it accessible to communities of all sizes.

The benefits of our solution are many: improved health, increased productivity, greater peace of mind and empowerment. And with our commitment to affordability and sustainability, we're making sure that our solution is accessible to everyone.

We're proud to be the first company offering this solution, and we're excited to make a real difference in the world. Join us in our mission to bring safe and sustainable sanitation to all, and let's make a positive impact together.

With best regards,
Dieudonne Kwame Agudah
